{tab=Pillow Top}

Luxurious Reversible Seasons Top Panel

Our patented, Seasons reversible top is made for enhanced body contouring, using the latest in 4-way stretch fabric technology. In the middle is a layer of Quiltflex to ensure the stability of the entire top.

Select Comfort® 9000

The Select Comfort® 9000 comes with a pearl colored, zippered top, with a jacquard ticking, featuring a double jersey knit, 100% rayon sleeping surface. It is a non-reversible, Duvet-style pillowtop.

{tab=Visco}

2" High Density Visco-Elastic Comfort Layer

Our Visco-Elastic comfort layer is made of 2" of true 6lb Memory Foam (we encourage you to weigh it just to be sure!).

Our memory foam comfort layer is completely removable, flippable, and rotatable, for maximum comfort and longevity.

Select Comfort® 9000

The Select Comfort® 9000 comes with 1.5" of visco-elastic memory foam (no density given).

{tab=Latex}

2" All Natural Talalay Latex

In addition to Memory Foam, we offer a Latex option, an all natural alternative. Latex provides a firmer, supportive feel as an alternative to Memory Foam.

Select Comfort® 9000

Select Comfort® does not offer latex.

{tab=Comfort}

5-Zoned Comfort Layer

Our 5-zoned comfort layer provides 2.5" of additional comfort over the air chambers and eliminates any seams or gaps you may feel. Each of the 5 zones is designed for the individual parts of your body, ensuring the best sleep for a lifetime.

Select Comfort® 9000

The Select Comfort® 9000 comes with a 2.5" layer of Intralux® foam.

{tab=Air Barrier}

Revolutionary Air Barrier

Air Barrier is a layer of stretchable Teflon mesh attached to the Memory Foam by a thin breathable layer of fibers. This lets air breathe between your body and the foam, reducing excess heat buildup as you sleep, without hindering the feel of the memory foam.

Select Comfort® 9000

The Select Comfort® 9000 does not offer anything like Air Barrier for increased airflow.

{tab=Air System}

7" High Strength, Nylon-Urethane, Tri-Zone Air Chambers

Made of superior nylon-urethane, the same material used in hospitals and medical equipment all over the world, Tri-zone allows you to have a soft airbed experience while maintaining lower back and lumbar support your body needs.

Select Comfort® 9000

The Select Comfort® 9000 air chambers are made of 24-gauge rubber, covered in non-stretch cotton.

{tab=Pump}

4-Port Pump with Digital Controls

The 10K3 comes standard with the Intelligent Air 4-port digital controller with two separate memory buttons. Find your favorite support numbers for your body and mid-section, and a great night's sleep is just a button away.

Select Comfort® 9000

The Select Comfort® 9000 comes with the Select Comfort® Firmness Control™ system pump and the option of either a single wireless remote, or two, wired, digital remotes.

{tab=Support}

8" Patented High Density Concave Foam Rail System

8" Patented High Density Concave Foam Rail System provides for an expanded sleeping surface, and also accepts the naturally rounded shape of a filled air chamber for better comfort and increased support of your air bed.

Select Comfort® 9000

The Select Comfort® 9000 comes with straight foam sides that are not covered and not attached.

{tab=Base}

Revolutionary iSystem Steel Box-Spring Foundation with Free Legs or Casters

8" You'll never need to buy another box spring again! Simply add our optional iSystem to your cart and you'll experience the best support money can buy. All steel frame is easy to assemble (no tools!) and fabric coverlet is included.

Select Comfort® 9000

The Select Comfort® 9000 offers an optional interlocking foundation made of plastic, as well as plastic legs, and a fabric coverlet.
