## Air bed Removable Tops

The top layer of an air bed is, in some ways, the most critical. First, the top layer controls the specific feel of the bed and sets it apart from the other beds in the Bed 4 Life Air bed lineup. Second, the pillowtop gets the most wear-and-tear of any air mattress, and therefore must be made with materials that are healthy, durable and will hold up to years of normal use. Feel free to learn more about the different pillowtops in the Bed 4 Life air bed series, and find the air bed that's right for you.

Use the links on the left to learn more about our Airbed Removable Tops.
